

## Call for Papers

### Geochemistry/Chemie der Erde

#### Special Issue:

**25<sup>th</sup> Session of Petrology Group of the Mineralogical Society of Poland**

**Petrology in narrow and wide perspective:  
Connection between petrology and another sciences**

#### Guest Editor

**Guest Editor:  
Prof. Jacek Puziewicz**

**Editor-in-Chief:  
Prof. Astrid Holzheid**

#### Topics of Interest

Petrology, in its original meaning, is a science deciphering origin and evolution of rocks forming the Earth. To achieve their goals, petrologists use a wide variety of analytical methods. In last few years a usefulness of petrological methods was much appreciated in other areas of science: archaeology, geophysics, soil sciences, environmental studies, industry related to inorganic materials... The usage of petrological methods in various sciences is the leading topic of the 25<sup>th</sup> Meeting of the Petrology Group of the Mineralogical Society of Poland.

Therefore, "Geochemistry – Chemie der Erde" has an open call for original research articles where petrological methods have been used in classical and non-standard approach. Submissions by participants of the conference and other scientists using petrology in their researches are welcome.

We invite submissions in above mentioned topics of interest for three types of papers: review articles, short letters and original articles

**Submission Deadline: 31. January 2019**

**SUBMIT YOUR MANUSCRIPT** via online submission system:
